Newton[®]

Dear Newton Champions,

This document is intended to provide you with information about some of the third party software applications that are being developed for the Newton 2.0 operating system. It is a partial list. Many companies plan to release information on their products in the near future. For the most up-to-date information on software applications available for the Newton 2.0 operating system, please check the Newton web site (<http://www.newton.info.apple.com/newton>).

Best regards,
Newton Systems Group

Newton

Personal Productivity

Avail

1250 OakMead Pkwy
Sunnyvale, CA 94088
408-730-6855; Fax: 408-746-3630

Contact: Daryl Scott
E-mail: Avail@applelink.apple.com

AvailWorks 2.0 For Newton — The only Newton software to integrate text processing, spreadsheets, drawings and graphs into a single application. Lay out a full 8-1/2 by 11 inch page for faxing or printing — what you see is what you get. Works with Avail ClipArt for Newton Libraries!

Avail ClipArt For Newton Libraries — Five professionally-drawn clip-art collections (created by the T/Maker Company). Each collection includes 100+ images, a special Newton ClipArt Installer package, plus a free bonus Newton utility “Avail NotepadPlus For Newton.” Works with AvailWorks for Newton!

PowerWare

36 Foxhill
Irvine, CA 92714
1-800-640-2068; Fax: 714-262-9381

Contact: Gary Amstutz
E-mail: GaryA@eworld.com

ExpensePlus 2.0 — ExpensePlus 2.0 provides an efficient way to report, categorize, and store the expenses you incur for events, projects, and trips. Whether for your company expense report, or for tracking deductible expenses for income tax purposes, ExpensePlus automatically prepares comprehensive reports that can be printed directly from your Newton. Custom expense reports can also be generated by linking to popular Macintosh and Windows-based software, such as Microsoft Excel or FileMaker Pro.

True North, Inc.

460 Route 101 Suite 8
Bedford, NH 03110-5036
603-472-7888; Fax: 603-472-7887
1-800-846-9278

Contact: JB Parrett
E-mail: truenorth@eworld.com

Gulliver 2.0 — A Newton 2.0-savvy application which provides itinerary management, frequent flyer mileage tracking, a travel vendor information database, and automated Newton localization. Users can enter flight and hotel/car information via an optional companion desktop application.

Out of Pocket — A Newton 2.0-savvy expense application. Specifically written with business users in mind, it features full support for managing client/project/trip tracking, budgets, meal and entertainment documentation, and foreign currency exchange. A variety of plug-in expense report formats are provided, as well as extensive support for exporting of expenses to popular desktop finance and accounting packages.

Now Synchronize — Now Synchronize provides the ability to share the same calendar and address book between Newton devices and Now Up-to-Date & Contact — creating the first truly portable organizer for Macintosh and Newton device users.

Personal Media — The Personal Media software environment turns the MessagePad into a convenient and practical handheld tool for managing client and project information. Personal Media provides pads of paper for capturing information and workspaces for organizing by project, client or task. An unlimited number of notepads or textpads can be created and arranged on these workspaces, providing a fast, free form way to take action on information.

PocketMoney — PocketMoney is a stand-alone personal finance package with the ability to import and export data to Quicken, MS Money, Mac Money and other desktop applications. PocketMoney is fast, handles split transactions, prints checks and expense reports, and is supported by other Newton packages.

PowerWord for the Newton — Seamless desktop integration will be here soon! PowerWord for the Newton (due in January, 1996) will allow users to browse their Macintosh or Windows computer from any location with your Newton PDA. Use PowerWord on your Newton to open and save word processing files on your desktop computer. Use a modem, serial cable, AppleTalk or even infrared beaming to open and save word processing documents directly to and from your desktop computer.

Quicknames Pro — Quicknames Pro provides a significantly faster and more flexible interface for the Names file. It supports the ability to access contacts by first, last or company name; displays recently opened names; offers autosearch on selected text; and features one tap dialing, printing and beaming.

Action Names 3.0 — Action Names 3.0 supercharges the Newton's address book and calendar with scores of productivity enhancing improvements. Agenda screen includes associated contacts for the day or week. Full contact history. Action Names is the best selling contact manager, and an essential add-on for every Newton owner. Totally re-written for the new operating system.

Berlitz 5 Language Interpreter — Now carry five languages in your pocket and never be at a loss for words—or entire phrases—when you travel for business or pleasure. Over 20,00 words in English, French, German, Spanish, and Italian, plus 5,000 useful phrases are included. Phrases are easily translated by selecting a category such as shopping or transportation, and then scrolling through a list of appropriate expressions and their clear, idiomatic translations. It's like having a personal interpreter.

PaperPak 1.0 — Includes seven pieces of intelligent stationery for the Notepad. Includes improved phone message, personalized memo, graph paper, fast direction taking pad, scrolling paper for presentations, blank paper, personalized memo paper, and the ability to link notes to Names. A great example of stationery which s a new feature in Newton 2.0.

Pocket Quicken — With Pocket Quicken, stay on top of your personal and business expenses, right as they happen. Instantly update your checking, savings, credit card, even cash accounts, whenever and wherever it's convenient. Track business expenses by trip, project, or client. Get account balance information, spending details, business expense reports, and more in seconds. Plus, easily connect to desktop Quicken (Macintosh or Windows) and Quicken ExpensAble (Windows only) — you'll never have to double-enter expenses, and you'll always have your up-to-date financial information at your fingertips.

Synchronizer — Synchronizer is an application for the PC and Newton that synchronizes Windows Schedule+ with Newton's Dates file. (Note: the product name will change).

TeamAgenda — Synchronize your Newton schedule with your office (even wirelessly with Version 2) by using TeamAgenda, the leading group scheduler in Europe on Macintosh.

TimeReporter 3.0 — The premier time and billing package. Based on a familiar time sheet format and designed for fast capture of data. Comes with seven reports including invoice. Data can be easily exported for use in desktop billing and spreadsheet programs. Re-written to take advantage of Newton 2.0. Faster, smaller.

TunWar Life's Objects — An information manager that allows the user to link all of the information stored in the Names, Notes, and Dates files of the Newton, plus additional groups of information the user creates. The Newton then becomes an information source for all of the users personal and business life.

Aloha 2.0 — Aloha is a Newton e-mail client for AOL. Aloha performs an AOL flash e-mail session sending all messages waiting to be sent in the Newton Outbox and collecting all new e-mail messages into the Newton Inbox.

CIS Retriever — CIS Retriever is a graphical Newton client for CompuServe. It allows access to CompuServe e-mail, forums, news and stock quotes. Messages can be read and replied to on-line or off-line. The automated mail exchange feature makes sending and receiving e-mail quick and easy.

FirstClass Retriever+ — FirstClass Retriever+ is a graphical Newton client for the FirstClass conferencing and e-mail system. It allows access to e-mail and conference messages. Messages can be read and replied to on-line or off-line. FirstClass Retriever+ supports keyword searching and message history features. The Xchange feature automates sending and receiving mail.

Eudora Client for Newton (freeware) — QUALCOMM's Eudora™ software is written to official Internet standards and, with over 4 million users, has already proven itself to be the most popular and reliable way to exchange mail on the Internet—as well as the ideal solution for the growing number of businesses and institutions embracing Internet-style networks. Purchase Eudora Pro™ for your desktop or home computer, and download our free Eudora Client for Newton to give you complete freedom of movement... take your mail messages with you wherever you go.

Mail on the Run! — Mail on the Run! software offers unprecedented remote access to LAN-based e-mail systems. Mail on the Run! for Newton 2.0 enables users of Newton-based communicators to connect — over telephone, cellular or wireless packet networks — with the world's most popular mail systems, including Microsoft® Mail and cc:Mail™. Seamlessly integrated into the Newton user environment, Mail on the Run! users can send, receive, store, forward and reply to messages on their e-mail system using powerful filtering capabilities.

Graffiti — Graffiti is the fastest, most accurate way to enter text into your Newton. That's why it's the number one selling Newton add-on application of all time. Now Palm Computing is introducing Graffiti 2.0 designed explicitly for Newton 2.0.

KwikMenu — KwikMenu is the dashboard for your Newton! KwikMenu makes your Newton much faster to work with by reducing many multi-step operations to just a single tap. Commands include: new meeting, note or to-do, computer connect, reboot, extended font styles, multiple clipboards, text glossary and more.

NewtCase — NewtCase provides essential utilities for Newton 2.0.

OrthoGraph — OrthoGraph is a handwriting recognizer that is completely trainable to a particular user's handwriting. It provides time-out free recognition in a pen input window. (Note: name may change.)

Contact: Rick Giles
E-mail: Holosoft@eworld.com

Equate — **Equate** is an Excel compatible spreadsheet that provides import/export to Excel using the “Desktop Direct” software that was created by Holosoft. Equate previously used Newton Connection Kit to perform import/export and so this provides a significant performance advance over the previous solution. Equate can import Excel workbooks (Excel 5.0) which is one of the most asked for features from our customers. It also supports screen rotation with the new OS. There are many enhancements to the program from our previous version all based upon customer feedback.

FormLogic Builder — A PC/Mac development environment enabling the user to create intelligent forms-based applications for the Newton.

FormLogic Server — The FormLogic Server distributes and retrieves FormLogic data to and from the Newton via serial, modem, or wireless connection.

Gaia Forms — Gaia Forms can be used to create custom applications for the information needs of an organization. Forms can be used for data collection, sending data to a remote computer, performing queries on remote databases, and distributing information within an enterprise. A unique advantage of Gaia Forms is their “paperlike” look and feel. The familiarity of paper means lower training costs and greater ease of use in the field.

Informed Filler for Newton — With Informed Filler for Newton your data is never left out of the picture. Data you collect can be sent straight to your Windows or Macintosh form, ready for action. Change it, sign it, print it, mail it, or send it to databases. Forms look and work just like real forms. From expense, order or survey forms to those specialty forms unique to business — whether it’s insurance, health care or bungee jumping — Informed works the way you work.

PowerForms — PowerForms lets you custom design forms for your business directly on a desktop computer or on your PDA. It allows you to place company logos and other graphics in your documents and even supplies multiple tools to make data entry a breeze. Poplists, text, radio buttons, check boxes... PowerForms has it all.

FileMaker Pro Companion — This application turns the Newton into a FileMaker Pro 3.0 client, allowing users to browse, sort, query and switch to various layouts. Users can automatically capture and download forms and data directly from a FileMaker Pro 3.0 database to their MessagePads. Once disconnected from the FileMaker network, users can then browse, query, sort and modify data on the Newton, and later synchronize data directly with the original FMP 3.0 database host.

Corporate Connection — Corporate Connection software enables Newton 2.0 users to automatically and transparently establish and execute communications with information providers, legacy systems and corporate data bases over wireline and wireless packet networks. The Corporate Connection product gives application developers, systems integrators and value-added resellers the capability of creating powerful, communications-based end-user, vertical industry applications with minimal effort. At the heart of Corporate Connection is an extensive communications architecture and development toolkit with application programming interfaces (APIs) that provide:

- Sockets interface for client/server and program-to-program communications
- data compression and encryption
- support for PSTN, ARDIS™, GSM™ and DataTAC™ 5000 networks
- relational data base access via ODBC.

POCKET DOC™ — Pocket Doc was created in response to the need for a powerful mobile medical record system. It is designed to mimic the work flow of the physician, providing an intuitive user interface that is easily mastered. The system was designed to function as a stand alone productivity tool for the physician, though it may be completely integrated into an existing information system using our integration server. Thus, the system may be used in a small scale clinic

without a medical information system, as well as a large hospital as part of completely integrated system.

QuickFlight™ for Newton — QuickFlight™ for Newton allows multiple applications on an Apple MessagePad to easily access wireless communications networks including RAM Mobile Data and ARDIS in the USA, Mobitex and DataTAC 5000 internationally. It also simplifies the use of Global Positioning System (GPS) Receivers with a MessagePad. An ETE Wireless™ product.

Locomotion — Locomotion is a powerful sales automation solution comprised of a suite of fully-integrated modules which allow sales reps to organize all of their activities, notes, checklists, expenses, documents and contact-related information by Account and/or by selling Opportunity. Multiple selling opportunities may be associated with a single account. Locomotion is designed for use in a corporate sales environment when integrated with Windows-based GoldMine (PC Magazine's 1995 Editor's choice, Windows magazine's and others' 1995 choice as the best Contact Management package). It may also be used by individuals, either as a stand-alone sales tool or in conjunction with a notebook or desktop PC (the facility for connecting to an Access database is included).

TunWur SellMan — SellMan is a Sales Automation Tool that allows the members of a sales force to carry customer and price list information, as well as take orders very efficiently and then upload them to a desktop server or to mainframe/minicomputer systems.
